ABOUT THE HELLENIC AMERICAN PSYCHIATRIC ASSOCIATION, INC.

The Hellenic American Psychiatric Association (HAPA) was founded on May 15, 1999 to provide a professional home for Greek-American psychiatrists in the United States and the Greek Diaspora. HAPA is organized for educational, scientific and charitable purposes in the public interest, including connecting philhellenes with Greek psychiatry and its international goals.

Membership consists of psychiatrists and allied mental health professionals in the American Psychiatric Association, the American Academy of Child and Adolescent Psychiatry, the Hellenic Psychiatric Association and other mental health organizations that share Hellenic roots or a passion for Hellenistic values. HAPA provides a forum for psychiatrists to share experiences, establish a network for scientific exchange, facilitate professional development and advocate for the mental health needs of individuals, families and communities.

SPECIFIC ORGANIZATIONAL GOALS INCLUDE:

- 1** The promotion of professional affiliations through the continued study of the Hellenic heritage of Greek-American, Greek or Greek-identified psychiatrists who practice in the US, Greece, Canada and elsewhere.
- 2** The promotion of a cooperative relationship with organizations concerned with psychiatric and psychotherapeutic education, research and treatment.
- 3** The identification and advocacy for the mental health needs of communities of the US, Greece and the Diaspora.
- 4** The education of Greek-American and Greek communities of Greece and the Diaspora on mental health issues and services.
- 5** The recognition of outstanding service, achievement or scientific contributions in psychiatry, psychotherapy and psychoanalysis by Greek or Greek-identified psychiatrists.
- 6** The advocacy for the unique needs of psychiatrists of Greek origin.
- 7** The publication of written materials, conduct of research and organization of instruction in psychiatry and psychology.

Dr Maria T. Lymberis MD, DFAPA
